

Rig Up Services Line Sheet

Company History

Supreme Electrical Services, Inc. has been in the oilfield electrical business for over 15 years, building a respected reputation as a provider of electrical rig-up, electrical supply and service. The Stewart family has been in the oil and gas industry for over 100 years, since the oil industry began. These two entities were united when C. Jim Stewart III, the fourth generation of the 'Stewart' in Stewart & Stevenson, purchased Supreme Electrical in September of 2006 seeking to grow and diversify the company's products and services within the oil and gas industry. Robert R. Stewart, a member of the fifth generation, joined his dad to help build the Controls and instrumentation product lines and put together the rest of the team that provides new innovative products for both the rig-up and controls divisions of Supreme Electrical Services, Inc.

Supreme Electrical looks forward to the opportunity to provide its' products and services for all your electrical/control needs. We look forward to working with you and your company in the future.
